About

Front-end developer with full-stack experience and a designer's eye. I'm an Information Systems student at FIAP, and I build products from the ground up, from architecture to visuals, with React Native, Next.js and TypeScript. I'm also a music artist and producer, and I bring that creative sensibility to every detail of the projects I work on. I'm looking for an internship, a junior role or freelance projects.

Experience

Present — **Freelance Full-Stack Web Developer**
Remote

- Helped build a checkout system and an e-commerce site: initial architecture, front-end, back-end, database integration and design (confidential project, screenshots available on request).
- Websites and interfaces for a sushi restaurant, a marketing agency, a dance school and churches.
- Stack: React Native, Next.js, TypeScript, Tailwind CSS, Bootstrap and HTML.

Freelance — **Freelance Designer**
Remote

- Created banners and visual assets for different clients, with a distinct art direction of my own. Work available in my portfolio.

Artist — **Music Producer and Songwriter**
Davi Grabalos

- Wrote and produced several singles, one EP and two albums, released on all major streaming platforms.

Earlier roles in customer service and transportation (service attendant, freight company driver and rideshare driver), which built responsibility, autonomy and people skills.

Projects

In progress — **Kola Project**
Career growth app, currently at the prototype stage.

FIAP — **Conecta Saúde**
University project on reactive management of public hospitals in Brazil. I worked as back-end and front-end developer and on the visual presentation. The solution includes a dashboard, a hierarchical tree, a basic data structure and integrated maps.

Portfolio — **Portfolio website**
My own site with my designs and prototypes.
